Academic Year 2025-26

CERTIFICATE

This is to certify that, the Mini project entitled “_____” is successfully carried out as a mini project and successfully submitted by following students of “PCET's Pimpri Chinchwad College of Engineering, Nigdi, Pune-44”. Under the guidance of **Prof.** _____ In the partial fulfilment of the requirements for the First Year B. Tech. Computer Engineering.

Table of Contents

Rubric Table for Assessment of Mini Project

B. Mini Project Evaluation Rubric (40 Marks)		
1. Problem Definition & Innovation	Clarity of problem statement, relevance to syllabus, uniqueness and creativity of idea.	8
2. Design & Implementation	Proper use of data structures, functions, OOP, file handling, exception handling as applicable.	10
3. Functionality & Accuracy	All features working correctly, validation checks, user-friendly interface	8
4. Code Quality & Documentation	Well-structured code, comments, modular design, project report with diagrams and explanation.	6
5. Demonstration & Viva	Project presentation, explanation of logic, answering questions confidently.	8
	Total	40

PRN	Name of the Student	8M	10M	8M	6M	8M	40M

Project Guide Signature

1. Introduction (Header should be in bold, Font size-14, Font style Times New Roman)

Sample for Subheading

- 1.1 What is the project about?
- 1.2 Why this project was chosen

The project report should be prepared using **Times New Roman** font with a **font size of 12** . All paragraphs must be aligned in **justified** format to ensure a neat and uniform appearance. The **line spacing should be 1.5** to maintain readability across the document. Every **figure** included in the report must have a properly numbered **figure caption** placed **below the figure**, while every **table** should include a **table caption** placed **above the table**. These formatting standards help maintain consistency, clarity, and a professional presentation across the entire project report.

2. Problem Statement

- Clear statement of the problem
- Input and output expected
- Real-life relevance (if any)

3. Objectives of the Project

// Mention relevant details

Example:

- Understand Python programming basics
- Implement logical thinking

4. Software / Hardware Requirements

5. Algorithm

- Step-by-step procedure
- Written in simple English
- Can include:
 - Main algorithm
 - Sub-algorithms

6. Flowchart

- Visual representation of logic
- Should match algorithm
- Clearly labeled symbols

(Hand-drawn or software-generated both acceptable)

7. Program Code

- Proper indentation
- Comments included
- One program per page (if printed)

8. Sample Input and Output

- Input values entered by user
- Output produced by program
- Screenshots

9. Result and Observations

- What did the program achieve?
- Was the output correct?
- Did it meet objectives?

10.Learning Outcome

- What the student learned:
 - Syntax of Python
 - Logic building

11.Conclusion

- Summary of project
- Effectiveness of solution
- Scope for improvement

12. References

- Textbooks used
- Notes
- Websites (if any)
